Fiberon Expands Color Palette for Pro-Tect Composite Decking Line

November 4, 2011

NEW LONDON, N.C. – Fiberon, a leading manufacturer of PVC and composite decking and railing products is introducing an expanded color palette for the new Pro-Tect™ capped composite decking line. With the popularity of exotic hardwood looks in alternative decking, the new Pro-Tect Chestnut and Gray Birch colors offer exotic aesthetics to an ultra, low maintenance outdoor living product. Combined with an entry level price point and a 20 year warranty for performance, stain and fade, Pro-Tect decking provides homeowners a premium upgrade to traditional lumber and hardwoods.

"The best aesthetics in alternative decking products drive market demand. Offering homeowners innovative, low maintenance products that retain their beauty for years, enhance their quality of life and the values of their homes," states Edie Kello, marketing director for Fiberon.

The strong, rigid core of Pro-Tect Decking is encased on three sides in a patent-pending, non-organic surface material that is extremely resistant to staining, fading, scratches and mold. With Pro-Tect Decking, cleaning and maintenance is easy, and painting or staining is unnecessary.

Pro-Tect deck boards are now available in four colors: two solid colors, Canyon Brown and Harbor Gray and two multi-chromatics, Chestnut and Gray Birch. All colors are available in grooved (GV) boards for hidden fasteners in .935 in. x 5.4 in. x 12, 16 and 20 ft., and also square edge (SE) in 20 ft. boards. For more information on Fiberon Pro-Tect Composite Decking and additional Fiberon products, visit <http://www.fiberondecking.com/products/protectDecking>.

Fiberon composite decking and railing products are sold to professional contractors through a national and international network of distributors and retail outlets.
