Fiber Composites, LLC announces distribution agreement with CertainTeed Corporation

NEW LONDON, NC (July 23, 2009)----Fiber Composites, a leading manufacturer of alternative decking, railing and fencing solutions has entered a distribution agreement with CertainTeed Corporation to promote the Fiber Composites PVC decking product line. Manufactured by Fiber Composites, the PVC decking line will be marketed and branded by CertainTeed as EverNew® LT.

EverNew LT decking is a cellular PVC decking material that provides ultra low maintenance benefits with the added advantage of Fiber Composites patent pending 'Lumenite' fusion-bonded surface technology. Providing unparalleled stain and fade resistant performance, EverNew LT decking is backed by the industry leading ten year stain and fade warranty and CertainTeed's lifetime limited performance warranty.

Doug Mancosh, President of Fiber Composites noted that "CertainTeed is clearly a leader in the building products industry and as such, brings new market opportunities for Fiber Composites PVC decking technologies. Their strength at reaching the one step distribution channel will complement our current efforts to build decking and railing business through our two step distribution base which promotes Fiberon® branded composite and PVC decking and railing products."

EverNew LT decking will be available through CertainTeed in four colors which include Saddle, Sequoia, Dune and Greystone. The product will be promoted with emphasis on its low maintenance attributes and the premise that its stain and fade resistant properties will provide enduring beauty for years to come.

### **About Fiberon**

Fiberon is a leading manufacturer of composite and PVC decking, railing and fencing products used in homes and light commercial construction across North America. Part of the Fiber Composites, LLC family, the Fiberon brand product line is designed specifically for professional contractors. Fiberon's polymer chemists and extrusion professionals employ the latest technology to constantly innovate, using the finest raw materials coupled with leading manufacturing processes to ensure best-in-class quality. The company was founded in 1997 and is privately owned with operations in North Carolina and Idaho.
