

Build Your website!

Get connected and get seen with Fiberon and the FiberPRO Site Builder

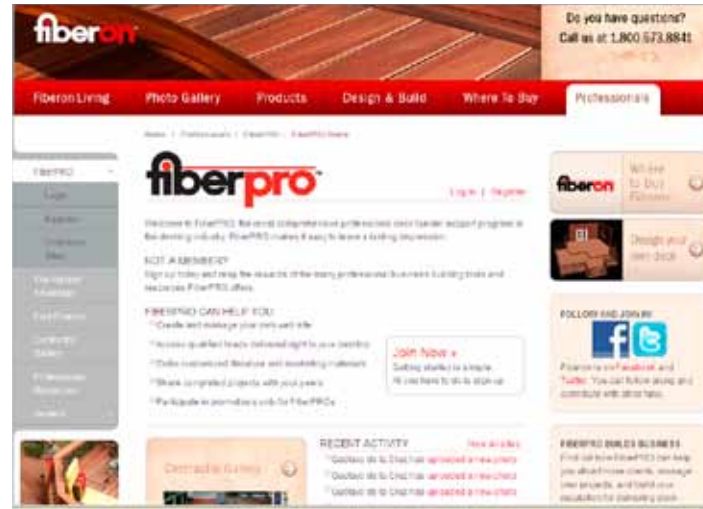

Did you know members of the FiberPRO program can build a website hosted right on FiberonDecking.com? The FiberPRO Site Builder offers a home page, a place for you to blog, run your own photo gallery and most importantly a presence on the web.

- The first thing to do is log into FiberPRO.
- Next, select the Site Builder link from the left hand menu of the FiberPRO page.
- Follow the simple instructions.

Once you've created the site you'll need to finish it out in style with your logo and pictures of your best builds. Even if you already have a company site, there's no better place than FiberonDecking.com to show off your skills.

Things to keep in mind:

- Optimal logo size is about 300px by 150px, but Site Builder will size your logo for you.
- Get some text on your home page; customers want to know about you, your philosophy of building, years in business, where you are located, etc.
- Collect images of your best work in one place and upload them in the Site Builder gallery.
- Activate your site once you're finished!

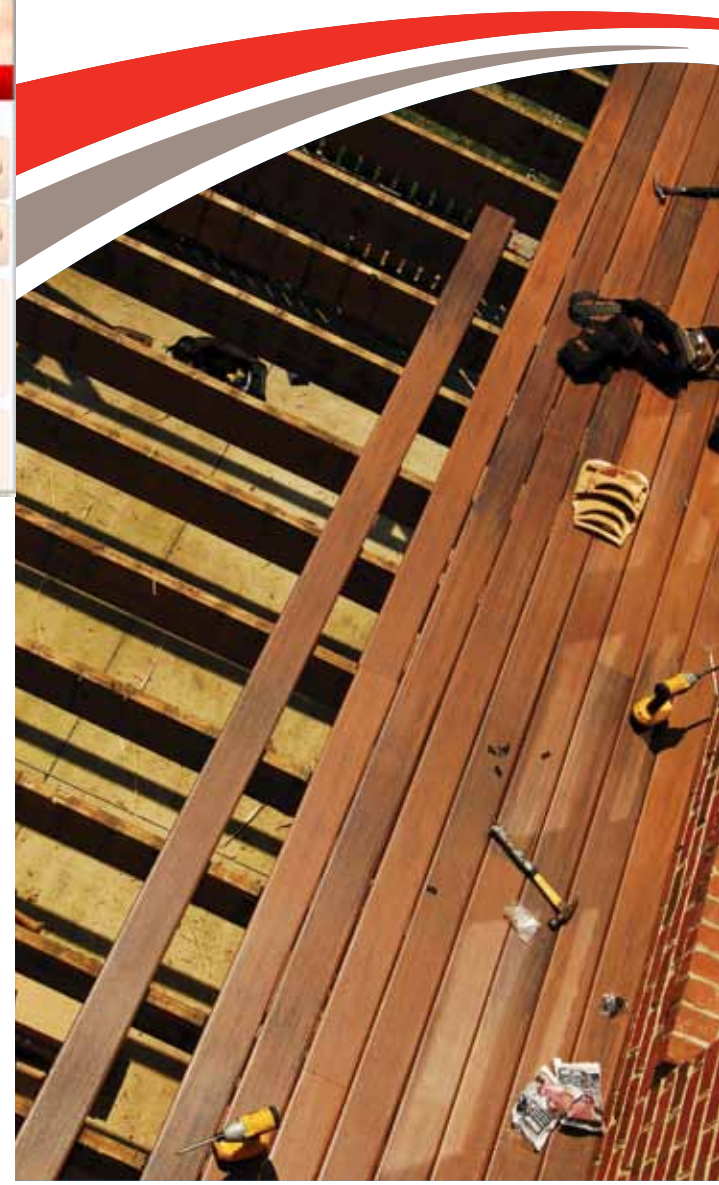

Join FiberPRO

Receive Cash Rewards for your Fiberon Purchases!

New Cash Rewards Program Exclusively for FiberPro Deck Builders

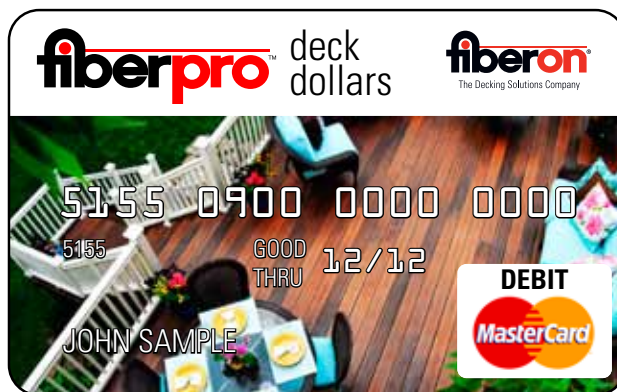

Exclusively for U.S. FiberPros, the FiberPro Deck Dollars Program rewards your Fiberon decking and railing purchases with dollars that go directly to your own FiberPro debit card. For designated months, dollars will be loaded to your debit card based on a percentage of your Fiberon decking and railing purchases.

Program Features:

- A DeckDollars MasterCard issued to all enrolled FiberPros in the U.S.
- Payouts to your MasterCard for purchases of select Fiberon Decking and Railing products
- Special added spiffs for new products like the Inspirations Guardrail System
- Easy access to check your available DeckDollars
- Submit Invoices within 60 days of store invoice date

Leads for the Professional

Homeowners can find you on FiberonDecking.com through four sources.

1. Fiberon LeadManager *Contractor Lead Collection Form*

<http://www.fiberondecking.com/design/leadmanager>

Detailed contact information from a homeowner is distributed electronically directly to FiberPros.

- Leads are sent to three contractors closest to the homeowner's zip code via email
- The same three contractors contact information is emailed to homeowner, which creates a two way opportunity between homeowner and contractor.

2. Traditional List Locator

Find dealers, contractors, and distributors by zip code.

3. Fiberon Deck Design Tool

This tool collects detailed contact data while granting the user access to a powerful interactive deck design tool. This contact information is submitted to the Fiberon LeadManager.

- Creates qualified leads delivered to contractors and dealers
- Builds detailed cut and material lists
- Gives user access to closest dealers and contractors

4. Contractor Gallery

FiberonDecking.com's innovative contractor gallery feature allows contractor members of FiberPRO program to upload their Fiberon decks. This gallery is searchable by zip code and every submitted photo is connected to the contractor.
