

### Benefits

- Speeds installation while providing hidden fastening without extra cost of hardware
- Positions fastener in the right spot and angle
- “Bit stop” ensures the screw is driven to exactly the right depth
- Carpenter sat any skill level can operate properly and consistently
- Firmly fastens both edges of each deck board to every joist with two 2-1/2" stainless steel screws, which prevents sagging or structural racking
- Fasteners are virtually invisible
- Eliminates need for painted screws; can use less costly plastic or ceramic coated steel screws

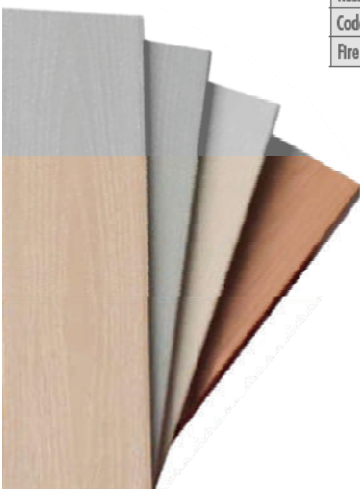

### DeckPilot™ Hidden Fastening System

The DeckPilot Hidden Fastening System (patent pending) is the fastest, most economical, hidden fastening system in the decking industry. This foolproof tool, designed exclusively for Sensibuilt decking, allows contractors to install deck screws at the proper angle and precise depth – every time. There’s no need for extra hardware, and no extra cost! Precise, fast and inexpensive, Deck Pilot is the best alternative to the costly and difficult to install products currently on the market.

### Sensibuilt Decking Specifications

Width	5 1/2"
Thickness	1"
Length	12 ft, 16 ft, 20 ft
Colors	Mocha, Driftwood, Redwood, Cedar
Installation Method	Face screw 16" OC, no pre-drilling, hidden fastener available (Deck Pilot)
Residential Warranty	10-Year Fade/Chalk, Lifetime on Substrate
Code	ICC- AC-174 approved, ADA slip resistance
Fire Code	ASTM E84; 20 (Class 1 Flame Resistance) Self-Extinguishing
