

The New Deck Pilot—the only hidden fastener with nothing to hide

Exclusive New Design for Fiberon PVC Outdoor Flooring

Benefits

- Precise, fast and inexpensive, the new Deck Pilot allows contractors to install deck screws at the proper angle and precise depth – every time
- Speeds installation while providing hidden fastening without extra cost of hardware
- Carpenters at any skill level can operate properly and consistently
- Eliminates need for costly hidden fastener clips and painted screws
- Fasteners are virtually invisible
- Firmly fastens both edges of each deck board to every joist with two 1-5/8" corrosion-resistant screws, preventing sagging or structural racking

New Design!

- Injection-molded with 30% glass-filled nylon: tougher and resistant to breaking
- Double-sided to reduce installation time
- New 3/16" replaceable steel pins for accurate spacing and reduced installation time
- New tough, hardened bushings made from hex-stock steel making it impossible to spin
- New arched base keeps tool flat
- Adaptable – tool can be cut in half without losing its strength to make two short tools for restricted areas and special patterns

- Deck Pilot Kit comes with two T15 (38 mm) bits, also sold separately
- Uses 1 5/8" steel coated, corrosion-resistant trim head screws
