

Product	Fiberon[®] Inspirations[™] and Horizon Plus[™] Railing Systems
Installation Notice	Reference marks for measuring are located on one end of top and bottom rails
Description	Reference marks for measuring have been added to one end of each top and bottom rail. Use top and bottom rails with these marks on the same end to ensure routing holes align for cutting. For line sections, the measurement to the routing holes is the same distance from these marks for both top and bottom rails. Dimensions from reference marks for top and bottom rails for stairs may be different even though starting from the reference end is still crucial for proper alignment.

Additional Product Information  <i>Ultra Low Maintenance Composite Railing</i>	Fiberon Inspirations[™] Railing <ul style="list-style-type: none"> • Elegant profile made of low maintenance PVC composite • Available in white with color baluster choices for custom design <ul style="list-style-type: none"> ○ installed in square or diamond pattern ○ Horizon Plus baluster colors ○ Black round metal balusters • Rail daggers firmly anchor balusters • Hidden brackets offers clean look
